MAKING COMPLIANCE SIMPLE WITH GEMBA

The Gemba System allows Agencies to monitor and manage all their legal, compliance, quality reporting, risk management, OH&S as well as document management reporting within the one system.

The Gemba Compliance system has been setup and implemented at some Agencies in under 24 hours. For a new IT solution this is simply unheard of! Most IT systems are difficult and take over 12 months to implement! The Gemba system is quick, easy and user friendly.

Most agencies operate from a number of sites and have to meet a range of legal and compliance obligations. These obligations includes reports to Australian Taxation Office, Superannuation bodies, Office, funding bodies and all of this just takes time.

The Gemba System allows Agencies to manage all their reporting from within a single system - Gemba. Onsite training which is included in the set up costs is really valuable for all staff.

The ability to rollout Gemba in under 24 hours shows just how simple it can be for your Agencies.

HOW IS THE GEMBA SYSTEM HELPING AN ABORIGINAL HEALTH SERVICE?

Agencies are looking for a simple way to manage and coordinate all of their compliance obligations. Publicly funded agencies are noticing that government funding bodies are tightening the funding provided. So having a cost effective and efficient compliance solution is now even more important.

To operate a highly effective agency, CEOs must comprehend every facet of the business and be able to lead the organisation through every part of the management cycle. Managers and Staff need systems in place to support the work they do. Often these systems are fragmented and end up making more work for staff!

The Gemba System is a single system that was recently implemented at an Aboriginal Health Service. This Web based Compliance System was implemented in under 24 hours in November 2012 and is now being utilised to support all the functions shown below and over the page.

This Gemba System is also supported by a Compliance Team at Kaizen Synergy Law Firm. Managing Compliance has never been easier. The Gemba system supports all of your staff in their roles. If they have any questions, they can contact the Gemba Compliance Team at Kaizen Synergy and get advice about any legal, compliance, workplace issue, risk management or even just bounce around an idea.

OUR STAFF ARE EXCITED ABOUT GEMBA AND HOW EASY IT IS TO USE

- CEO of Community Health Service

WHAT AGENCIES USE GEMBA?

Gemba is used by over 5000 User agencies across Australia. These agencies vary in size from 1 Manager up to over 15,000 employees.
